Conduction électrique Power supply

La souplesse au service de la distribution d'énergie.

Lorsque flexibilité se marie avec compacité. Nos connections en tresses sont la solution aux environnements complexes.

Flexible answers for power supply.

*Braids offer more than reliability.
Flexibility offers an easy set-up in
a compact space.*

Mise à la masse.

Le design et la fiabilité au service des connexions de masse.

Earthing.

The design and the liability for the earthing connections.

Et aussi...

- Les solutions pour la signalisation et les infrastructures.
- Les solutions pour le conditionnement d'air et les distributions électriques à l'intérieur du train.

And more

- *The answers for signalization and infrastructures*
- *The answers for the heating ventilation and air conditioning, as well the energy supply inside the train.*

TRESSE METALLIQUE J.FORISSIER, Conception, Qualification et Production sont notre offre pour la réussite dans la création des connexions électriques.

«Pour nous, la réussite se traduit par un produit plus performant qu'attendu et compétitif face aux solutions standardisées.»

TRESSE METALLIQUE J.FORISSIER, Design, Lab testing and Manufacturing for successful electrical connexions.

“For us, success means offering a product technically better than expected for a price lower than the standard solution.”

CONCEPTION

Notre département conception est au service du client depuis plus de 20 ans dans la définition des produits dédiés au ferroviaire.

Our design department works since more than 20 years in the railway industry.

QUALIFICATION : LAB TESTING

- Chute de tension
Voltage drop
- Echauffement
Overheating
- Vieillissement
Rapid temperature variation
- Brouillard salin
Salt mist
- Flexion alternée
Mechanical fatigue test
- Vibration
Vibration

PRODUCTION

La plus large gamme, en Europe, d'équipement dédié aux connexions électriques à base de tresses et de feuillards.

The largest product range, in Europe, dedicated to electrical connections made with braids and strips.

→ Quality and services are our promises.

- ISO 9001
- EN 9001
- ISO TS 16 949
- ISO 14001

→ 4 KNOW-HOW TO BE CONNECTED.

Mixing the four technologies lets us offer you the largest range of flexible connections in Europe.
This ability gives you the benefit of performance as well as the right solution at the right cost.

- Braiding
- Welding
- Extrusion
- Mechanical and Machining

INTERNATIONAL WIRE Group

Tresse Métallique J.FORISSIER is nowadays a first class supplier in the railway industry. We are designer and manufacturer of electrical flexible connections including customized lugs and ultra flexible conductors. We offer to our customers a large support in the design and the conception of the connectors in order to meet the optimized answer between Function, Cost, Easy fit and High quality level.
